

Sanitizer Timer for Pools and Spas

Model EH40 SaniTimer™

Type 3R Outdoor Plastic Enclosure 2T2502GA

Type 3R Outdoor Metal Enclosure 2T2485GA

The Intermatic SaniTimer™ automatically controls any pool or spa sanitation system. It allows the user to program the operation of the sanitizer (chlorine generator, UV or ozone) to correspond with variable speed pumps having dedicated control timers. These built-in controls operate only the pump itself. The SaniTimer™ is ideal for installations where variable speed pumps with built-in timers are used without system-wide pool and spa control automation.

FEATURES

- Saves Energy - Capable of six (6) On/Off events each day over a 7-day period
- Weekend Settings – Schedule to operate more on the weekends, when bather loading is heavier
- Easy to Install – Snaps into existing timer enclosures
- Battery Backup – Maintain power during outages
- Easily Accessible Manual Control – External override switch
- LED load indicator
