

POWERFUL WINTERIZING COMBO

WINTERIZING INSTRUCTIONS

1. Balance the water.
2. Shock the pool with a standard chlorine shock.
3. Clean the pool and backwash sand filters. Thoroughly clean D.E. or cartridge filters.
4. Add 1 ounce of AlgaeShield® per 1,000 gallons of pool water.
5. Add 16 ounces of MetalShield™ per 10,000 gallons of pool water. MetalShield is the **only** metal stain remover uniquely formulated to work in conjunction with AlgaeShield for maximum performance.
6. Follow pool and equipment manufacturer's freeze recommendations. Unused AlgaeShield must be stored at a temperature above 32° F.
7. Cover the pool and shut down the filter.
